

PEAK

A HIGH LEVEL GLIDER
TO MAKE YOUR WILDEST
DREAMS OF SUCCESS
REALITY

THE ULTIMATE CROSS COUNTRY MACHINE

The PEAK is the indispensable tool for long distance cross-country flying. The PEAK will guide you in the air, working in perfect harmony with the elements, allowing you to optimise your flights and quickly become at one with your glider. Its incredible

ability to locate and core thermals will without doubt astound you. The PEAK has been carefully designed to allow you the realization of your dreams and your wildest flying fantasies.

ACCESSIBLE PERFORMANCE

Three rows of lines, a remarkable arch, an awesome look and an outstanding performance makes it the ultimate glider for long distance flights, the best available at the moment!

Olivier Nef (designer) has pushed the limits of modern paraglider design by exploring new profiles and new construction paths. With the PEAK you choose to fly the best glider available in its class.

PERFORMANCE TO GET YOU TO YOUR GOAL FASTER

The PEAK eliminates the need to fight with the glider and allows you to relax, flying in perfect harmony and at one with the surrounding elements. Your very first flight will give you the combined sense of confidence, intuition and ease of use. The excellent glide will be noticed immediately and during

turbulence the PEAK becomes the master of the air, allowing you the confidence to reach your goals. The acceleration is rapid and smooth allowing easy penetration through the air mass. The transition of flight during changing conditions is natural with the PEAK and the efficiency it provides when the all important glide towards your goals are required is the time the PEAK will make your dreams a reality.

EVEN MORE PERFORMANCE

Flying the PEAK will not only be pleasure in all conditions but the speed of ascent in even the lightest of conditions will amaze you. Whether following cloud streets over the mountains, in the flat lands or flying near the ridges, the PEAK handles like a fighter and will prove its superiority against other wings in the air. The Peak will allow you to fly the perfect flight in all conditions.

For the pilots wishing to compete the Peak is the perfect choice. Its full potential will soon become apparent and you will soon find yourself above the rest and dominating the stack. Flying the Peak feels so natural that you will soon realise that your dreams can become reality.
